AGRICULTURAL ECONOMICS

- Condliffe, J. B. AMERICA'S FOREIGN-TRADE POLICY. N.Y. Univ., Institute on postwar reconstruction, Series 4, No. 2., 1944. 39 p.
Moore, Arthur. THE FARMER AND THE REST OF US. Boston, Little Brown & co., 1945. 226 p. 281.12 M78

"Here is the true and entertaining story of the American farmer of the corn belt with his traditions and prejudices, his farm block, his distrust of labor, and his passion for high prices. In considering local conditions the author raises questions which apply to agriculture throughout the nation. Mr. Moore's discussion of farm problems is the personal story of farmers whom he knows intimately.

"America's farmers exist in perpetually unsettled circumstances, under conditions over few of which they have any control. The apathy of 'the rest of us', the mutual antagonism of farmer and worker, the mild contempt of the city dweller for the farmer, all help to complicate the situation.

"This is not a book for farmers, though farmers will read every word of it. It is a plea to city dwellers to understand--and act on--their most pressing problem--food."--Book jacket.

GRAZING

Barnes, W. C. APACHES & LONGHORNS. Los Angeles, Ward Ritchie press, 1941. 210 p. 1138.B26

"One of the most stirring stories ever written of the real life of the West. It is more than biography; it is history full of source material & informative sidelights on conditions in early Arizona and the West. But most of all it is adventure--the adventure of the life of a man of action in the days when the challenge of dangerous enterprise was the lot of those who made America.

"This book is written in terse, swift, graphic language with a smack of cowboy lingo and droll humor."--Book jacket.

SPIDERS

Thorpe, R. W. BLACK WIDOW, AMERICA'S MOST POISONOUS SPIDER. Chapel Hill, Univ. of N.C. press, 1945. 222 p. 434 T392
"For ten years the authors engaged in tireless investigation. They housed hundreds of specimens in their basements and spent many hours in observing the eating, nest-building, and mating habits of this species. They examined all available literature, corresponded with scores of doctors, and accumulated more than a thousand spider-bite case histories. The product of these researches is the present book--the first full-length book to deal with the black widow spider and related species. The doctor, the nature student, and the man-in-the-street can here find out just which spider bites are dangerous to man, which is the most poisonous of all spiders, what symptoms result from its bite, how the victim may be treated, and how the creatures' numbers may be controlled.
